

*Compassion, Commitment, Recovery*

## To our Medicare Patients

---

Please be advised effective **January 1, 2019**, Medicare's **Deductible is \$185.00**. The cap limit for Physical Therapy is **\$2,040.00** for outpatient physical therapy (PT) and speech-language pathology (SLP) combined. Based on our calculations you will be covered for approximately 18-20 visits. Our front desk will keep track of this cap and once you are close to meeting this limit, the therapist will do a re-evaluation and advise you and the front desk on how to proceed.

Medicare does have an exception process we can follow for you to continue your therapy. This requires us to submit a Plan of Care to your medical doctor every 10 visits or 30 days. We do ask you to see your referring MD and request an updated signed Plan of Care and/or new prescription in order for us to continue demonstrating medical necessity.

If you have any questions, please do not hesitate to speak to our front desk.

Thank you for choosing ActiveCare Physical Therapy!
